

## MONTENEGRO

### MONTENEGRO HIGHWAY: THE BAR – BOLJARE HIGHWAY SECTION SMOKOVAC – UVAC – MATEŠEVO

#### BRIEF DESCRIPTION

Supervision of the construction of 41 km of highway to be constructed by a chinese company between the cities of Smokovac and Mateševo. Eventually, the highway will link the cities of bar and Boljare, hence connecting Serbia to the Adriatic Sea.

#### CHARACTERISTICS

The project is located in a mountainous region and includes about twenty tunnels and viaducts. Among these engineering structures, there is a series of tunnels with a length between 1 and 3 km and a viaduct supported by piers 130 meters high. With a quality environment to be preserved and within a site of highly variable geotechnical characteristics, this highway project is an outstanding one with real technical challenges.

#### OWNER

Ministry of Transport and Maritime Affairs of Montenegro

#### ASSIGNMENT

Full engineering design and construction supervision

#### PARTNERS

GEODATA

#### CONSTRUCTION COST:

850 M€

#### FEES

19M€

#### YEARS

2015-2020
